Discover a World of Opportunity™

DEPARTMENT OF  
EXTENDED  
LEARNING

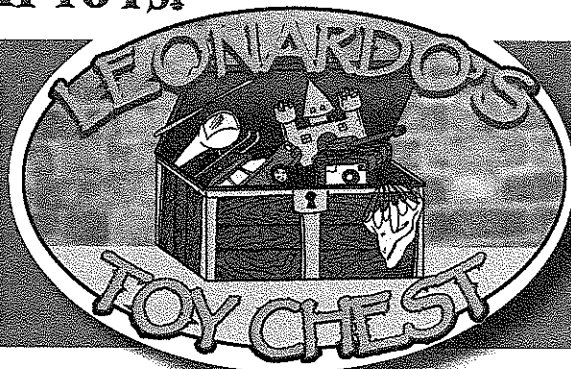

## HAVE A BLAST DISCOVERING SPACE!

Explore the stars and constellations as you take an out-of-this world sky tour in our homemade planetarium (Parents invited). Prepare for lift-off as you build and launch your own rockets while learning about Newton's Laws of Motion. Use your astronaut wits and come join us on our mission through outer space!

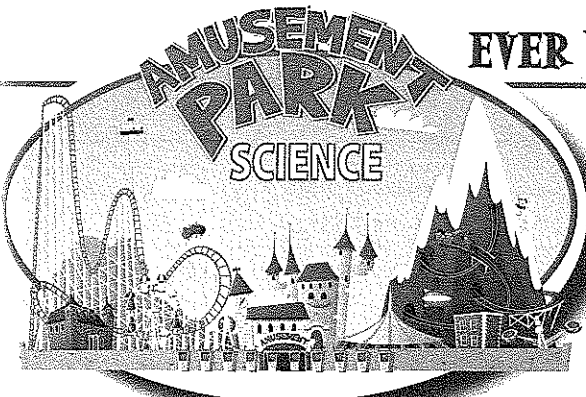

## DA VINCI'S GREATEST INVENTIONS MAKE GREAT TOYS!

Many of Leonardo da Vinci's great inventions were scientific marvels...and make excellent toys. Fill your toy box with wooden creations of your own. The morning session will be filled with clockwork cars, attacking a castle with your own catapult, creating a camera obscura, and showing your artistic side while making a revolving stage. The afternoon will be filled with other inventions including the improvised car, creating a pinball machine, designing a robot drum, and racing a paddlewheel boat. You'll explore the mind of one of the world's greatest people - Leonardo da Vinci!

## EVER WANT TO DESIGN YOUR OWN AMUSEMENT PARK?

Master circuits & motors as you create the rides of your dreams. Harness the forces of gravity to construct a room-sized roller coaster. Twirl, ride, bump and dive your way into this thrill ride of a camp! Experiment and see how things can flash, fizz, stick and glow while building your own fun physics carnival with mini rides and games. Experience techno candy that chemically reacts in your mouth and explodes with flavor. Investigate solar-sunglass science and flashing LED polymer squish balls. The fun never ends when you take this carnival home and challenge your friends.
